PROFILE

Motion Designer and UI/UX Designer with a background in Software Engineering (DAE/ADSE). Skilled in After Effects animation, Adobe Illustrator, visual asset design, and YouTube SEO with expertise in channel growth, keyword research & content optimization.

EXPERIENCE

● Motion Graphics & Editing

Animation & Visual Storytelling

- Produced a documentary-style video using After Effects, featuring kinetic typography, custom visual effects, and seamless scene transitions to enhance narrative storytelling.
- Created a dynamic short-form motion graphics, utilizing complex path animation and precise keyframe timing for smooth visual morphing.
- Designed a motion infographic video, combining custom data visualization, animated vector icons, typographic layouts, and energetic visual effects.

● Graphics & UI/UX Designing

Design Expertise & Visual Projects

- Designed a full travel web and mobile app layout featuring component hierarchy, intuitive search structure, and seamless dual Light/Dark mode themes.
- Created complete brand identity assets and logo concepts for "Artbox," including custom icon design, color variations, and presentation mockups using Adobe Illustrator.
- Designed and developed a dynamic, dark-themed landing page using HTML5, CSS3, and JavaScript, featuring conversion-focused UI components, structured facility sections.

● YouTube SEO & Channel Growth

Metadata Optimization & Search Visibility

- Scaled a short-form channel to 22K+ organic subscribers by leveraging algorithmic trends, strategic hashtag research, and metadata structuring.
- Produced high-retention shorts with consistent visual grading and aesthetic branding, optimizing titles, tags, and thumbnails to maximize feed reach.
- Created engaging short-form videos featuring synced text overlays and dynamic visual clips, applying targeted keyword strategies to drive search discovery and retention.
